The book "Biblical Black History: The Exodus" explores the untold story of the black Israelites. This book is written by Dr. Conrad W. Worrill, a professor of African American Studies at the University of California, Berkeley. In this book, Dr. Worrill argues that the Israelites were not white, as they are often depicted in popular culture, but black.

Dr. Worrill's argument is based on a number of factors, including the biblical text itself, archaeological evidence, and the historical context of the Exodus story. The biblical text, for example, describes the Israelites as having "dark skin" and "kinky hair." Archaeological evidence also supports the idea that

the Israelites were black. For example, excavations in Egypt have uncovered statues and paintings of black Israelites.

The historical context of the Exodus story also supports the idea that the Israelites were black. The Exodus story takes place in Egypt, which was a major center of black civilization at the time. It is therefore likely that the Israelites were part of this black civilization.

The book "Biblical Black History: The Exodus" is a groundbreaking work that sheds new light on the Exodus story. This book is a must-read for anyone who is interested in the history of the Bible, the history of black people, or the history of slavery.

This new perspective is important for understanding the history of black people and the history of slavery.

Finally, the book "Biblical Black History: The Exodus" is a call to action. Dr. Worrill argues that the Exodus story is a reminder that all people are created equal and that no one should be enslaved. He calls on us to work to end racism and slavery in our own time.
