

Brain Science Makes Sense Of Your Peculiar Personality

Are you peculiar? Do you have a personality that confounds others? If so, you may be in luck! A new book by Dr. John Doe spells out the scientific reasons for your unusual traits.

In his book, "Brain Science Makes Sense Of Your Peculiar Personality," Dr. Doe argues that our personalities are shaped by our brains. He identifies eight different brain regions that are associated with different personality traits. For example, the prefrontal cortex is responsible for planning and decision-making, while the amygdala is responsible for fear and aggression.
