

Capitalism's War on the Earth: A Call to Action

Capitalism is a system that is based on the endless pursuit of profit. This profit motive has led to the destruction of the planet's environment. The burning of fossil fuels, the clear-cutting of forests, and the overfishing of oceans are just a few of the ways that capitalism is destroying the Earth.

The effects of capitalism's war on the Earth are already being felt around the world. Climate change is causing more extreme weather events, such as hurricanes, floods, and droughts. Rising sea levels are threatening coastal communities. Air pollution is causing respiratory problems and other health issues. And the loss of biodiversity is making the planet less resilient to climate change.
